

Windows 11: Connecting to Wi-Fi

If you are not connected to Wi-Fi, you will see the globe icon on the bottom right of your screen (circled in the image on the right).

Click on this icon.

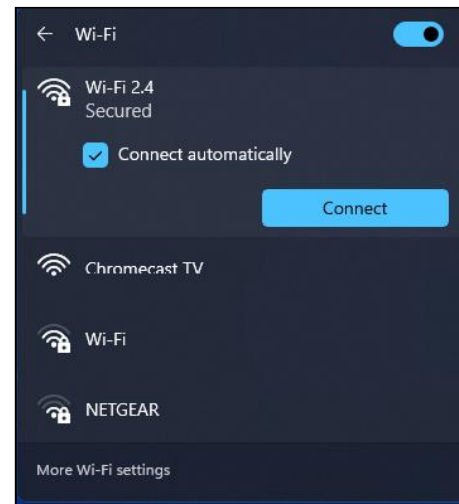

This window will pop up, when it does click on the icon circled in the image on the right.

You will then see all of the available Wi-Fi networks available in your area.

Select the desired network, click on Connect, and enter the security key (password).

Once successfully connected, you will see that the globe icon has been replaced with one representing wireless signal strength
